About MISSO

The Management Information Systems Student Organization has more than 20 years of history that began in 1983. The organization was formed to create a fellowship of students interested in pursuing a career in Information Technology. Today MISSO has developed a strong relationship with many of Houston's top employers. Our mutually beneficial relationship provides members with one-on-one exposure to the employer and gives the employer a chance to speak to a highly motivated group of young professionals.

Our Students

MISSO boasts a very diverse membership. Our members bring a wealth of cultural, educational, and professional experience to every meeting. Students who participate in MISSO typically graduate with more experience, better networks, and higher GPAs. Additionally, MISSO offers every student majoring in MIS an opportunity to enhance their skills by taking on leadership roles, working in groups, and learning real business applications for MIS curricula outside of the classroom.

Why Recruit from MISSO?

MISSO takes the guesswork out of choosing effective employees. We take the professional development of our members seriously. Our workshops, presentations, and events are designed to give our members the insight and experience required to be top performers from day one. MISSO alumni are an asset to any company.

How to get Involved
